SAFETRUST INNOVATION

SafeTrust Innovations is a visionary company with an ecosystem that identifies opportunities in the financial markets (Forex and cryptocurrency markets), creates solutions and provides customers protection against most risks to their virtual property while managing their digital assets.

We are driven and inspired by the diversification of demands present in the financial market and the need to create possibilities built on proven innovations to ease trade, commerce, or exchange and yield results.

UNDERSTANDING THE FOREX MARKET AND CRYPTOCURRENCY

The foreign exchange (forex) market is a market for currencies. It is the largest and most liquid market in terms of the total cash value traded, and any entity or country may participate in this market. There is no central marketplace for currency exchange. Trade is conducted OTC. The foreign exchange market is open 24 hours a day, 7 days a week, and currencies are traded worldwide among the major financial centers.

The forex market has a daily trading volume of about 6 trillion US dollars. The average daily trading volume in the forex market out-competes that of other financial markets, and traders can hold both long and short positions. It is possible to start trading with a small amount of capital and a reasonable amount of knowledge of forex trading.

Cryptocurrency markets are decentralized, which means they are not issued or backed by a central authority such as a government. Instead, they run across a network of computers. Unlike traditional currencies, cryptocurrencies exist only as a shared digital record of ownership, stored on a blockchain.

Cryptocurrency trading is the act of speculating on cryptocurrency price movements via a CFD trading account, or buying and selling the underlying coins via exchanges.

Of all the other advantages of Forex and cryptocurrency trading, one major advantage remains the convenience of being able to easily conduct transactions and trades over the internet regardless of where you are.

OUR COMPANY

SafeTrust Innovations Limited is a global company and is registered in the United States, the United Kingdom, the Cayman Islands, South Africa and the Republic of Türkiye.

Our SafeTrust robotics and innovative expert systems operate by collecting vend and trade data, trading volume, volume of operation and other applicable data to correctly predict market movements.

These robotic and innovative expert systems have, however, proven to be very efficient after undergoing several examinations and assessments and are fit to be sold as a digital product to be of service to individuals and firms as they traverse the challenging and demanding financial market.

At SafeTrust Innovations, we are committed to standing by the concepts of expertness, masterliness, professionalism, innovation, alliance, coherence, and integrity to lead a bold new future of robotics and innovative expert systems globally and redefine value for customers.

We make the voyage possible. We're SafeTrust Innovation.

Our vision is to build a risk-free and dependable solution for our customers and to lead the future of robotics and innovative expert systems for the financial market.

OUR VISION

SAFE, SIMPLE, SEAMLESS (S-S-S)

SAFE

Beyond being a medium of exchange, money is a personal asset that receives conscious and unconscious protection from either being lost or wrongly used.

Trading is a bold decision to not only multiply this asset, but to secure it. SafeTrust Innovations was created with this narrative as a key player to ensure your assets do not just multiply or increase but are safe, secured, and protected from or not exposed to risk.

SIMPLE

We provide a simple, easy, and unique approach to the financial market. We take up this responsibility to ensure you leverage the financial market and its advantages without great effort.

SEAMLESS

In a world like ours, pace in delivery is strategic in achieving objectives. SafeTrust Innovation structure is dynamically designed to promptly deliver our promise to our customers smoothly, quickly, and without seams.

CORE VALUES

SAFE

We commit ourselves to utilizing excellent standards for our operations, services, and delivery that will generate the needed results and provide protection of all virtual properties and digital assets.

TRUST

We respect and revere the promises we make, and we give maximum devotion and fidelity to fulfilling them to the latter.

INNOVATIONS

We strongly support continuous learning, breaking the norms and introducing meaningful, feasible ideas and digital products capable of creating solutions and differentiation in our focus markets.

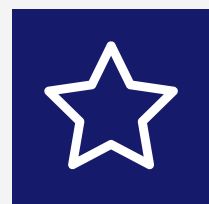

OUR CORE VALUE

Our company's values are the beliefs, philosophies, and principles that drive us. They impact the employee experience we deliver as well as the relationships we develop with our customers, partners, and shareholders.

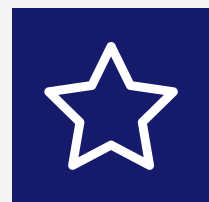

Our company's values are our company's DNA and they help differentiate us from the competition.

OUR MAGIC WAND – HFTLATB

The application of artificial intelligence (AI) for research and learning has led to the rise of algorithmic trading bots (ATB) and high-frequency trading (HFT) in the trading industry. Therefore, despite that number having decreased in recent years, BOT (algorithms), particularly HFT, were responsible for more than 60% of U.S. trading during the years 2009 to 2010.

In order to execute the best transaction, both small businesses and individuals use algorithms to sort through hundreds of data points per millisecond.

What exactly are "STI BOTS" (PRO, EXPERT, and SUPER BOT) now? This trading strategy carries out a lot of orders per second using computer systems. Additionally, this calls for the use of sophisticated AI algorithms that continuously scan the market for price divergence in bid-ask spreads. You can identify the ideal buy-sell possibilities. To host their computational power and execute trades more quickly, STI bots employ sophisticated cloud servers. Each one has a port for a cloud server.

STI BOTS as an HFT Latency Algorithmic Trading Bot works (HFTLATB). Without any trader input, the STI Bot executes thousands of standard deals in a matter of seconds. The algorithms used by STI Bots are built to automatically open and close thousands of different trades per second. In order to detect minor price arbitrage, trends, market volatility, and other things, it is programmed to sort through trading possibilities on the shortest time frames (1st TF to 1mTF).

Our objective is to identify the most secure short-term gains that are virtually impossible to capture by human traders. Our trading algorithms are designed to do thousands of computations every millisecond to assess the undervalue or overvalue of an asset. It recognizes right away when it executes a deal that is hidden from view. Most deals last between a few milliseconds and a second at most, are 90% accurate, result in a 10% loss, and are recouped on the following trade. Bot trading for STIs All markets include Forex, cryptocurrency, oil, and gold CFDs, among others.

Our quest for safe trading is very important to us.

SAFETRUST ROBOTICS AND INNOVATIVE EXPERT SYSTEM FEATURES

- **BG MONEY SCALPER (BMS):**

This customized trading system scans for trades with large Volumes and uses its advanced algorithm and a combination of advanced indicators to scalp quick profits from market in a short period of time with currency pairs and multiple time periods.

- **MARKET MAKER PAIRS (MMP):**

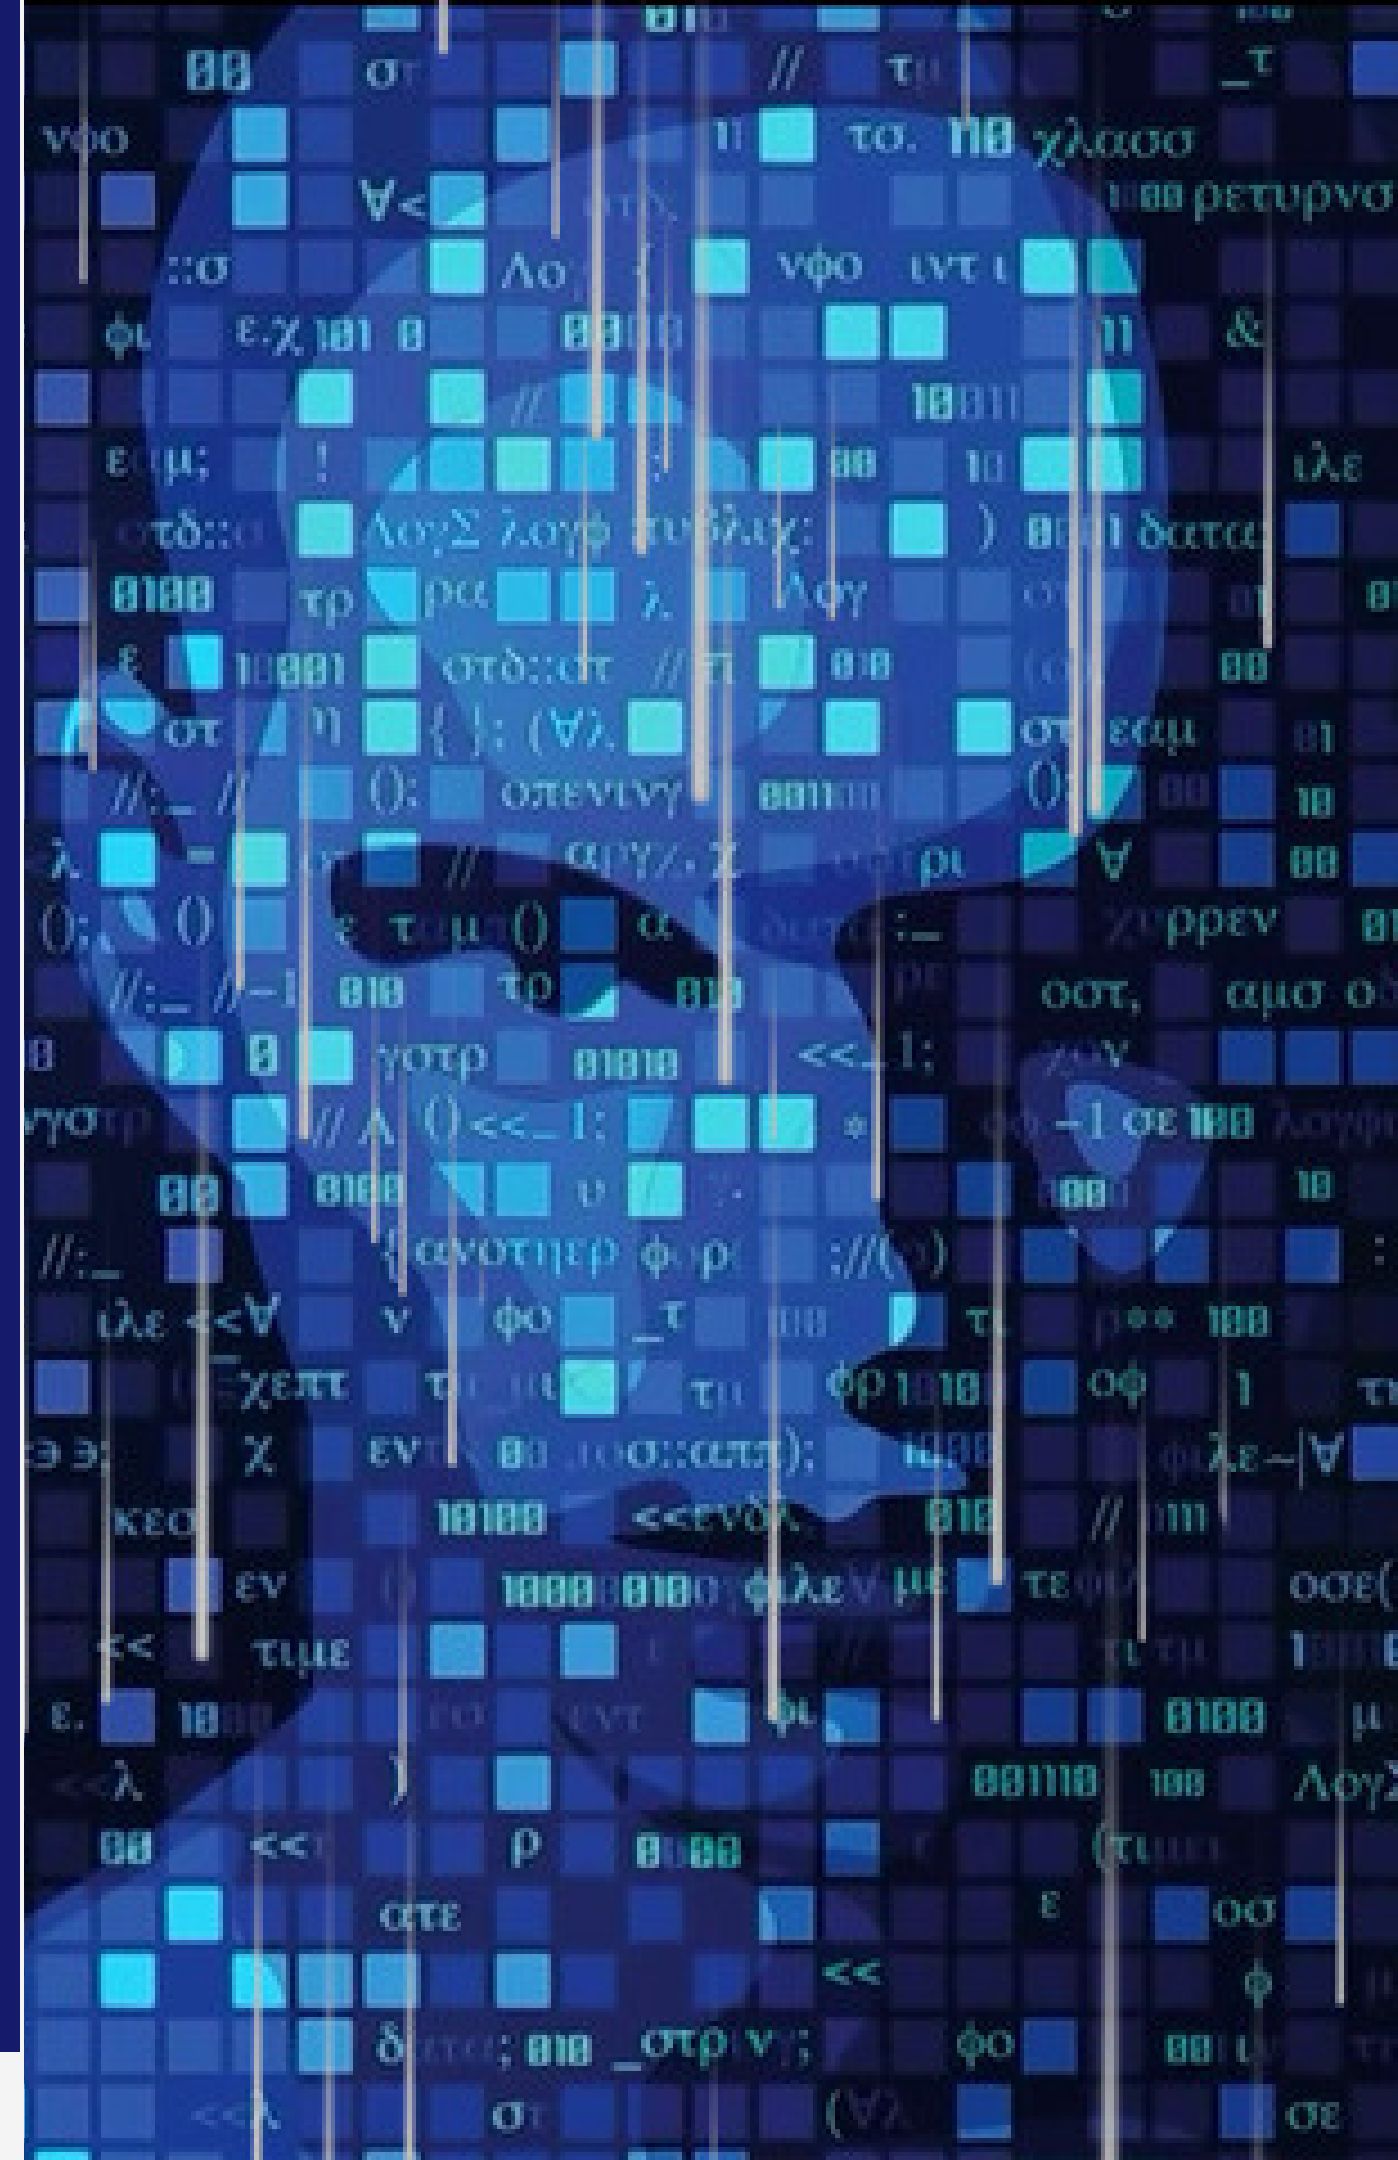

This is where the robot trades 18 of the most heavily traded currency pairs to calculate the current intraday trend and determine the appropriate intraday entry points.

- **MARKET MAKER ANALYSIS (MMA):**

It analyses the strengths and weaknesses of each currency during the day, and gives an accurate analysis of the trend direction for the day.

MAIN PRODUCTS TRADED

- Foreign Exchange
- Cryptocurrency
- Oil CFD
- Gold CFD

HOW TO EARN WITH SAFE TRUST INNOVATIONS

1. Make a deposit into your SafeTrust account (wallet), subscribe to one of our SafeTrust Robotics, fund the Bot, and begin profiting from trading.
2. To receive our referral bonus, refer new customers to subscribe to one of our SafeTrust Robotics and fund their Bots.
3. Qualified customers can earn sponsorship bonuses as they build their team and generate more sales.

DISCLAIMER

In no situation should the information provided in the course of this service be considered as a form of investment or financial advice.

Every piece of information rendered must be treated as general forex trading information. Before investing in foreign exchange, you should carefully assess your risk tolerance, financial goals, and level of trading competence.

Previous successes do not serve as a standard for evaluating your current and future trading performance in Forex. As a result, all of the necessary prerequisites for a successful trading experience must be met first and foremost.

We recommend that you assess your risk tolerance and obtain expert assistance from qualified agents who can make significant trading decisions on your behalf, as well as taking into consideration your financial and risk status.

Your continued use of our services confirms your agreement to these terms and conditions.

SPONSORSHIP BONUS/LOYALTY PROGRAM

General Referral bonus = 4%.

Earn up to 20% from our Loyalty Program.

Sponsorship Bonus/Loyalty Program

Tier 1

- Personal trading capital must be at least \$100.
- All direct referrals must have a total trading capital of up to \$5,000.

Bonus

- 10% of all direct referrals' robotics subscription fees
- 5% of the trading capital on the 1st generation
- 1% of the trading capital on the 2nd generation

Tier 4

- Personal trading capital must be at least \$2,000.
- All direct referrals must have a total trading capital of up to \$50,000.

Bonus

- 10% of all direct referrals' robotics subscription fees.
- 8% of the trading capital on the 1st generation.
- 2% of the trading capital on the 2nd generation.
